3. 2ND FILTER LAYER - Hyproof® Nanofiber microporous membrane
4. 3RD FILTER LAYER - PP non-woven
5. INNER FABRIC - polyester knitted fabric

XD Design Protective Masks - Treated with ViralOff®

99 % REDUCTION OF
VIRUSES IN 2 HOURS

ISO18184 tests against viruses (like Influenza, Corona, Hepatitis)

ViralOff
POLYGIENE TECHNOLOGY

ViralOff
POLYGIENE TECHNOLOGY

ViralOff® is a technology that stops viral activity through interaction with key proteins. It shows a 99% reduction of many different viruses, on a treated material, within a 2 hours timespan. Shown by ISO18184:2019, ATCC VR-1679 (H3N2) standard antiviral test.

The active ingredient present in ViralOff® is a reaction mass of titanium dioxide and silver chloride.

Due to ViralOff treatment the XD Design mask can be used during all day. It's not necessary to wash the mask on every use.

(However It is not recommended to wear the mask longer than 2-4 hours for each use).

The mask (with filter removed) is machine washable on 60 degrees and it can be washed depending on the frequency of use .

The ViralOff® is a durable and always-on treatment. For best performance and sustainability, wash less and only when needed.

Hyproof® Nanofiber filters

The unique lab tested Hyproof® Nanofiber filters have a high filtering efficiency by 95% towards bacteria & virus keeping you protected during all the time you were with the mask.

The Hyproof Nanofiber filter is a physical way to block the virus passing. Its advantage is that it has a long service life up to 200 hours.

Therefore, there is no time limit for continuously using it in a day, but when you take the filter out from the mask you have to re-sterilize it because it has the possibility of contamination.

The filter should be inserted from the side opening of the mask.

Disinfect the filter by soaking in boiling water for 15 minutes or by spraying 75% alcohol on the surfaces.

Each filter can be disinfected up to 10 times.

Replace with a new filter after a total 10 times disinfection to keep a constant filtering efficiency.

TOP 5 – Selling points

Set with Mask+ 5 filters + Mask pouch

High durability – Reusable & Washable

Masks treated with Viraloff® - hold 99% fewer viruses in 2 hrs

Hyproof® filters – High Filtering efficiency by 95% towards bacteria & virus

Extra Comfort
